Calian® Corolar™

Healthcare integration platform as a service (iPaaS) for smarter and faster interoperability

## Cloud native MLLP connector for HL7

Smarter Integration Environment

- Integration platform as a service (iPaaS) built for healthcare on Microsoft Azure
- Supports legacy and emerging healthcare standards and formats—HL7, XML, JSON, CDA, C-CDA, FHIR and others
- Connect over multiple transport protocols—MLLP, HTTP, FTP, Rest and others
- Transport and transform healthcare data from any-to-any format and protocol

Faster Integration Development

- Browser-based dashboard for full interface lifecycle management—build, deploy and manage
- Simple UI to easily build and quickly deploy clinical integration interfaces
- Quickly test interfaces as you define and build them
- Easily monitor and control interfaces with configurable alerts and notifications

Drive Innovation and Interoperability

- Integrated real-time clinical data platform to support clinical data repositories
- Collate clinical records across HIS in real time
- Easily links with best-of-breed health analytics systems
- Develop and manage APIs to clinical data

Native iPaaS Solution on Microsoft Azure

- Keep your existing interface engine
- No software to install, pay as you go and scale as you need
- Capable of running on private and public cloud
- HIPPA certified
